

Jennifer Stewart

Painter, Photographer, Digital Artist

I have lived on Magnolia for over 25 years with my husband Dan Metzger and an assortment of critters. All my life I have done some sort of art; there is no beginning. I believe doing art is a biological process, as vital as breath. I am not prolific and do most of my art in bad weather when I am forced to be indoors.

My website, which has been great fun and a huge education, features plants in our mountain area. It will never be finished.
